37) only 4 months remain during the current year and the water supply projects that are ready for execution are those of Shimoga, Kolar, and this place. It is likely that the liability of Govt will not exceed the budget allotment of Rs 50000/- provided in this year's budget. The Govt liability in case of Shimoga will be about Rs 30000/- ~~in case~~ Kolar 12000/- & Chintamani Rs 24180/- It is not likely that all the amount sanctioned will be required for

NOTE—Contn sheet

(G R S III 2]

General and Revenue Secretariat | M File No 153 of 1917

Serial No

Expenditure immediately. The expenditure could be spread over this year and next year. Reappropriation will also be possible from the item "Drinking water wells" as the Executive have complaints of all districts are unable to spend the large balances at their credit. In connection with the budget proposals of this year, I have asked that it would be desirable to increase the allotment under "water supply & Tanks" by Rs 50000/-, if necessary by reducing the allotment under "drinking water wells". If this is possible then a provision of Rs 1,50000/- will be available for expenditure during this and ensuing years, which with the similar amounts to be found from the local bodies will enable the Govt to purchase sets for only the water supply schemes to be finally approved.

38) This only can afford to pay a moiety of the cost of the scheme. Please see notes on page 5

FINAL NOTE BY THE TEMPORARY MEMBER OF COUNCIL

Subject ... Water supply to Chintamani Town.

These papers relate to the question of improving the water supply to the Chintamani Town at an estimated cost of Rs.48,361/-

2 In his letter No. 1483 dated 2nd February 1918 the Chief Engineer for Irrigation submitted for the sanction of Government two estimates amounting to Rs.7,600/- and Rs.52,566/- for opening a feeder to Vanamkunte which is the source of supply, and for providing a service reservoir and sand filters respectively He also stated that the Central Sanitary Board were in favour of opening the feeder channel at once, the arrangement for filtration being deferred.

3 On these proposals, the Deputy Commissioner, Kolar District, was requested to obtain the views of the Chintamani Municipal Council. The Deputy Commissioner with his letter No. I. F. 1983 dated 30th June 1918, submitted the resolutions of the Municipal Council agreeing to finance the works amounting to Rs.48,361/- omitting under the advice of the Sanitary Commissioner, the provision for sand filters estimated to cost about Rs 11,805/-

4. The Financial Secretary, who was consulted in the matter, states that there is no financial objection to the proposal being sanctioned if funds are made available under ~~the Scheme sanctioned~~ "Public Improvements" a grant for "Public Improvements" in the Budget.

5 As the number of schemes ready for execution is small and as the entire amount of Government contribution in this case will not be required immediately for expenditure during the remaining months of the year, I am of opinion that sanction might be accorded to the scheme and a Government contribution of half the cost amounting to

to Rs.24,180/- might be given, the other half and the entire maintenance charges being borne by the Municipality.

6. The Dewan has agreed with this view. The draft order put up accordingly may be approved

Chief Engineer for Irrigation,

Bangalore

To

B.Ramaswamaiya, Esq., B.A., B.L.,

Revenue Secretary to Government,

Bangalore.

SIR,

I have the honour to forward herewith for sanction two projects amounting to Rs 7,600 and Rs 52,566 for improving the water supply to Chintamani town.

2. The people complained to the Dewan when he was on tour in the District that the water supply was insufficient. The Executive Engineer was requested on the spot to investigate a project for increasing the capacity of the reservoir if feasible. Extract from notes of the Dewan's tour in Kolar District is enclosed for kind information.

3. The estimate amounting to Rs 7,600 provides for opening a feeder to Kanamakunte tank which is the source of supply. The report accompanying the project gives the details and necessity for the work.

4. At present unfiltered water is being supplied to the town. The estimate amounting to Rs 52,566 provides for sand filters and service reservoir. The report accompanying explains the proposals.
